

TacFuels® - Tactical Fueling Solutions

9760 Tactical Mobile Computer

U.S. DoD specified - The 9760 TMC is compatible with FuelsManager® systems already in use by the U.S. Defense Logistics Agency's Business Systems Modernization - Energy (BSM-E).

The rugged 9760 Tactical Mobile Computer (TMC) operating FuelsManager® software provides the local fuel farm operator real-time inventory data to manage, account for and report on their current fuel stocks and transactional fuel movements (receipts and issues) on a daily basis and then transfer this data to FuelsManager enterprise systems.

Benefits and Features

- Integral part of the Varec TacFuels system solution
- Fully ruggedized design - MIL-STD-8106 tested
- Fully sealed all-weather design - IP65 compliant
- Windows® 64 bit operating system
- 14" HD outdoor display - Direct-View™ technology
- Mobile broadband and GPS options

Configuration & Programming

All programming and configuration is performed by Varec's engineering services before the unit leaves the factory. Please contact a Varec sales representative for further information.
